Portfolio

Antananarivo, Madagascar

Profile

A software engineer with 4 years of experience in backend development with **Python** and **Go**, as well as expertise in **Ethereum**-based blockchain and cloud development on **AWS**.

Professional Experience

Lead Backend Developer, *Wylog Inc*
03.2019 – present | Antananarivo
- Promoted to **Technical Referent** in early 2021

(Intern) Web Developer, *Nacre Solution*
04.2018 – 09.2018 | Antananarivo

Projects

TracerDoc, *Wylog Inc*
10.2022 – 05.2023
Secure and decentralized document sharing tool
- Designed and developed a Vault plugin of type "secret engine" using Go.
- Led the development of the microservices-based web application using Go and Dapr.
- Leveraged the Ory stack for an OAuth 2.0/OIDC based authentication and authorization.

AkeenLife, *Wylog Inc*
09.2021 – 09.2022
A social plan management tool
- Implemented the RESTful backend service using Python and Django/DRF.
- Used Celery as task queue and Redis as cache and messaging broker to execute asynchronous and periodic tasks.
- Set up CI/CD pipelines using Docker and GitLab for linting, testing and deployment.
- Extensively followed Django's performance, optimization, and security best-practices.
- Wrote tests using pytest/pytest-django.
- Designed the database and made modifications according to the business requirements, provided documentations on configuration, backup, and recovery.

IdBroker, *Wylog Inc*
01.2022 – 03.2022
- Set up an identity broker by leveraging Keycloak to connect a web-based application to an identity provider using the SAML 2.0 protocol.
- Improved security and redesigned the login flow of the application by integrating third-party authentication with OpenID Connect.

Chain, *Wylog Inc*
03.2019 – 09.2021
A supply chain backed by a private ethereum network
- Collaborated and brainstormed with an English-speaking remote team for the design of the project.
- Implemented backend services, documented following the OpenAPI specification which improved the collaboration with the frontend team.
- Contributed to the implementation of a custom ERC 1155 based smart contract.
- Conducted research on how to handle smart contract events indexation. Resolved it by leveraging The Graph, which greatly improved development time.

Education

Master's in Computer Science, *Institut Supérieur Polytechnique de Madagascar*
2018 | Antananarivo

Bachelor's in Computer Science, *Institut Supérieur Polytechnique de Madagascar*
2016 | Antananarivo

Certificates

Coursera Specialization: Blockchain
Foundational concepts that enable a blockchain protocol.

Udacity Nanodegree: Cloud Developer
Cloud development and deployment on AWS.

Udacity Nanodegree: AI Programming with Python
Essential foundations of AI.

Skills

Programming languages
Go
Python
Solidity

Frameworks & Tools
Celery
Dapr
Django/DRF
FastAPI
Fluentd
go-chi
go-kit
gRPC
RabbitMQ

Databases
PostgreSQL
Redis
Vault

Containers & Orchestration
Docker
Kubernetes/K3S
Portainer

Cloud & DevOps
AWS
GitLab CI/CD

Web
OAuth2.0/OIDC
OpenAPI Specification
Ory Stack

Ethereum
Go Ethereum
The Graph
Web3

Languages

English **French** **Malagasy**
